ONE STOP HOSE SOLUTIONS

OIL & GAS INDUSTRY

Ormanlar A.Ş. was found in 1957. We are distributors of 12 hose companies and pneumatic fittings from all around the world (Industrial hose, Hydraulic Hose, Polyamide Hose, Thermo Plastic Hose, Stainless Steel Hose, Teflon Hose, Paint Hose, Polyurethane Hose and fire sleeves). And also we are distributor of Finn-Power Crimping machines of the middle-east, Balcan countries and TURKEY.

Ormanlar Hose Assembly Center & Hydraulic Hose Fitting Factory. Manufacturing of Hydraulic fittings & adapters and hose assemblies for steel and general industries. Also we produce special requirements for customer demands according to samples and drawings. Ormanlar bending pipe for automotive and general industries.

All activities mentioned above have been fulfilling in our own premises with hi-tech during both manufacturing and assembling including the necessary testing purposes. Our Hose Assembly center is designed with Industry 4.0 machines.

Ormanlar has been certified with ISO 9001 Manufacturing systems.

High Pressure Hydraul & Termoplastic Hose Lines

D&V Certified High Pressure Hydraulic Lines 50 to 1250 bar. For use with petroleum, synthetic or water based fluids in Hydraulic systems. Suitable for Ships, Agricultural, Earthmoving & Material handling equipment and machineries/systems. (Special Connections with Hammer Union or other types)

Industrial Hose Lines

Air & Water Hose: Mandrel built heavy duty water suction and discharge hose for handling of water, inert fluid, sewerages, waste water, where optimum flexibility is required.

Chemical Hose: Excellent in handling petroleum based products, hydrocarbon solvents, oxidising chemicals, major strong acid and alkali as well as organic fluid etc.

Oil & Fuel Hose: Mandrel built oil discharge hose for handling grades of gasoline or petroleum oils of aromatic content upto 50% in dispensing station etc, during winter/summer seasons.

Slurry & Mud Water Hose: For suction and discharge of slurry, mud and waste water

Composite Hose : Composite hose is manufactured from multiple layers of thermoplastic fabrics & films that are spirally wrapped and supported by internal & external wire helices. The multiple material layers make the structure of the hose firm, thus making it pressure-resistant. The high-grade material used to make composite hoses also provides greater safety. The composite hose is excellent for transferring fluids and provides exceptional flexibility. This makes it an ideal choice for a range of applications and uses.
